

Implementation of HANA Live ensures Better Visibility & Robust Reporting

SITUATION

The customer was looking to address the critical issues with their existing ERP systems that lacked dashboards and reports. The lack of quality visualization tools and the capability for mobile reporting was another issue that had to be addressed.

IMPACT

Lack of dashboards and reports and quality visualization tools in the current system impacted smooth business operations.

RESOLUTION

ITC Infotech implemented HANA Live and carried out customizations based on the customer's requirements. The integration of HANA Studio and SAP ECC with HANA database ensured real-time reporting and eliminated the ETL process. The process included implementation of Fiori apps and ensured the availability of reports and dashboards on mobile devices besides implementing solution modules for Dispute Management, Biller Direct, Collection and Credit Management.

The Customer

The customer is a wholly owned subsidiary of an international corporation and sells more than 3000 ingredients that are part of functional ingredients used in the food, beverage and nutritional industries worldwide. The company provides suitable products dedicated to these industries to specifically design products that are used to improve the texture and functionality of foods, beverage and nutritional products.

The Need

The business need was to implement a faster and more user-friendly system with dashboards and reporting capabilities. The specific need was across approval workflows, financial supply chain management and consolidated reporting.

The Solution

ITC Infotech addressed the issues faced by the customer through an end-to-end HANA Live solution implementation that included:

- Using HANA live for the migration of customized ABAP ECC programs for MM, SD and FI to data models in the HANA studio
- Using HANA design studio to develop more than 25 reports that could be accessed through the SAP BO portal
- Integration of HANA Studio and SAP ECC with HANA database to get real-time reporting that also eliminated the ETL process
- Implementation of Fiori Apps
- Ensuring availability of reports and dashboards on mobile devices
- Implementation of solution modules for Dispute Management, Biller Direct, Collection and Credit Management

Business Benefits

- Faster and more user-friendly SAP user interface
- Reduced manual effort involved in closing period end books
- Reduced manual effort required for posting elimination entries
- Provision of extended enterprise system to customer
- Better visibility on account payable
- WEBI and Crystal Reports based robust reporting system requiring very little or no manual intervention

ITC Infotech's Enterprise Resource Planning (ERP) Practice

ITC Infotech is a leading provider of cutting edge SAP Solutions helping clients leverage technologies such as HANA, Mobility, IoT and Analytics. As a Partner Edge partner, ITC Infotech co-innovates with SAP in key business areas including Supply Chain – Supply Chain Performance Management, in developing Mobility apps on the HANA Cloud Platform (HCP) and in developing IoT solutions for different business requirements.

Industry expertise, technical depth and commitment to completing projects successfully enables our 800 SAP consultants to deliver significant value across the lifecycle of SAP solutions for global customers.
