PLM Foundations: Enabler for global data and systems process harmonization

Executive Summary

A leading aircraft parts supplier is working with DxP Services on a major Roadmap to harmonize global data and systems processes

Lead time and cost reductions using Windchill

The Challenge

- Customer has acquired various companies – all with different business logic, methods and solutions
- Need to harmonise across the entire company
- Customer lack of knowledge regarding PTC Solutions and PLM large program deployment
- Large number of stakeholders

((•)) GO LIVE

Our Solution

- Engineering PLM solution – Rehost, clean and upgrade to Windchill 12.0.2
- PLM Foundations as first step of Roadmap and adoption plan
- DxP Services helped create Roadmap
- 30 users onboarded at Go Live, ramping up to 600 by end of Roadmap

Key Results And Benefits

- Reduction of lead time in projects
- Alignment of processes (streamlining)
- IT Costs reductions thanks to merge of multiple resources
- Enabler for further customer growth - a 2-year Roadmap for the future based on successful deployment
