

DxP Services helps to harmonize data model and working processes at leading engine systems solution provider

Executive Summary

DxP Services has migrated PLM data from a local legacy system to the customer's main corporate system. This means that the data is a Single Source of Truth, leading to savings on ownership costs and overall system improvements.

The Challenge

- Customer's PLM data was spread across 2 Windchill instances with different configurations and working methodologies
- Lack of data sharing and collaboration between local and global designer communities
- Unnecessary ownership costs generated by the local Windchill instance

Our Solution

- Migrate PLM data from local Windchill instance to corporate instance
- Harmonize data model and working processes
- CAD Data Management & Visualization
- Product Structure Management (eBOM)
- Document Management
- Windchill PDMLink, Creo, Windchill Bulk Migrator
- Project executed on time, on budget and to quality

Key Results And Benefits

- **Centralized data source** consolidating 2 independent systems
- **Data sharing and co-design through Single Source of Truth and harmonized data model and way of working**
- **Savings on ownership costs:** infrastructure, licenses, system administration and maintenance
- **General system improvement:** data replication, CAD data publishing, system performance
