CHALLENGE

The client had more than 100 customer-facing applications running on-premise, with high maintenance cost and challenges in performance impacting key functions including human resources and others.

- Flawless migration of on-premise workloads on Azure
- SaaS-based application management for optimized costs
- Eliminate the high cost of hardware and infrastructure
- Advanced security, access control, and single sign-on
- Accelerate digital transformation for scalability and future-readiness

SOLUTION

- Provided assessment and feasibility for applications migration on Azure
- Managed multiple stakeholders with complete ownership of migration roadmap
- Delivered high impact, zero friction migration of 100+ applications to Azure SaaS
- Configured Azure Active Directory (AD) for single sign-on and RBAC
- Configured Azure native security tools for identity access management
- Provided consistent hyper care support for enhanced customer experience
- Eliminated hardware cost with SaaS-based subscription model

RESULTS

- Ease of management and high availability of applications
- Applications scalability
- Business as usual with minimal disruption and zero data loss during migration
- Advanced security of applications with Azure Multi-factor authentication
