Implementation of Supply Chain Demand Planning Solution to Improve Planning Efficiency & Operational Reliability

The client is the world's leading Elevator and Escalator company based out of Europe.

Executive Summary

The customer lacked integration of business planning and S&OP processes, globally. They needed a supply chain demand planning solution to optimize planning & operational reliability.

Client Challenges

- Lack of integration in business planning, S&OP processes and geographical harmonization
- Gap in alignment of risk and opportunities in the market for financial projections
- Missing link of business goals to KPIs to monitor the planning and forecasting for different S&OP processes
- Legacy processes and system leading to higher operational cost

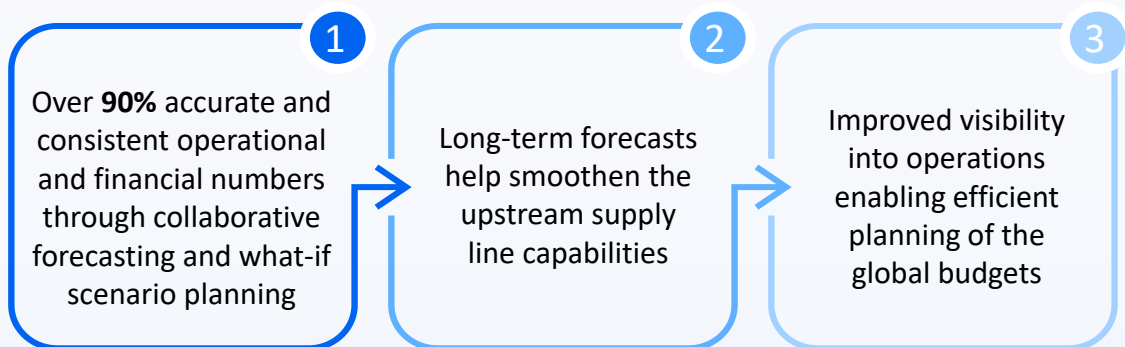

Our Solution

- Comprehensive solution harmonized for complex requirements in demand planning considering the diversified geographies of **60+ countries** and **550,000 customer** operations
- Customization of Quintiq Demand Planner Industry solution to meet the specific business requirements such as capacity planning and financial forecasting
- Workflow automation with seamless integration with data source for planning insights in Quintiq
- Statistical forecasting of financial elements based on different mathematical models
- What-If Scenario planning for different S&OP processes and integration with cloud data lake
