

A large circular image showing a warehouse worker from behind, wearing a white hard hat and a high-visibility yellow safety vest. The worker is walking through a long aisle of high industrial shelving units filled with cardboard boxes. On the left side of the image, there are semi-transparent, glowing blue and green digital overlays representing augmented reality data, including a circular gauge with the number '87' and various data points. The overall scene is brightly lit, typical of a modern warehouse environment.

CASE STUDY

Supply Chain Transformation of Warehouse using Rapid Rollout Configuration Toolkit

The client is a leading North American agriculture products company specializing in strawberries and other berries.

Executive Summary

The agro-giant was facing delays in operations and planning along with inefficiencies in Warehouse operations. A warehouse transformation was needed to streamline configuration processes & gain operational cost saving.

Client Challenges

- High lead time of 3 months for configuration of a single warehouse, leading to delays in operations and planning
- 120+ warehouses running on cloud on a single Warehouse Management System instance, leading to operational complexities
- High implementation costs associated with the legacy products

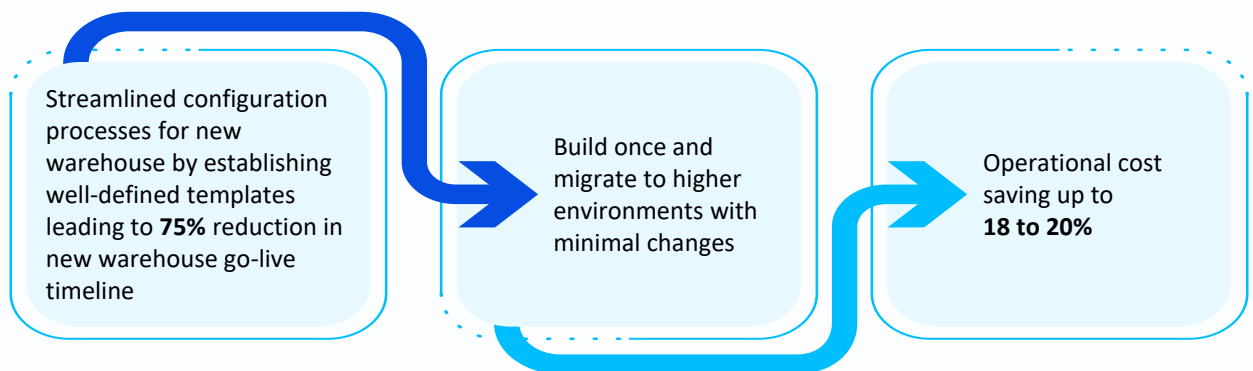

Our Solution

- Standardization of Warehouse configuration leveraging templates as per operational complexity (Full, Packaging, Basic)
- Tool based configuration of a new warehouse based on the template selection
- One touch configuration for new warehouses with export - import functionality.
- Quick comparison tool to benchmark multiple warehouses configurations
- Easy-to-use tools for business-led configuration team, with minimal IT intervention
