

Optimizing Costs and Uptime with Cloud Deployment for a Leading Financial Firm

A leading non-banking finance company partnered with ITC Infotech to modernize its IT landscape through cloud deployment and management. ITC Infotech implemented secure site-to-site connectivity, deployed critical resources on the cloud, and established a high-availability (HA) plan for all key applications. With 24x7 monitoring, continuous support, and proactive management of 100+ virtual servers, the client achieved 99.95% uptime.

60% Savings
by way of cost optimization

ITC Infotech is a leading global technology services and solutions provider, led by Business and Technology Consulting. ITC Infotech provides business-friendly solutions to help clients succeed and be future-ready, by seamlessly bringing together digital expertise, strong industry specific alliances and deep domain expertise. The company provides technology solutions and services to enterprises across industries through a combination of traditional and newer business models, as a long-term sustainable partner.

CHALLENGE

- Legacy infrastructure posed scalability and cost challenges
- Need for a secure and reliable cloud environment to host critical applications
- Lack of continuous monitoring and proactive support, leading to potential risks in operations
- High costs associated with traditional infrastructure management
- Demand for a single partner to handle cloud deployment and ongoing management

SOLUTION

- Implemented site-to-site connectivity to integrate various infrastructure components
- Deployed essential resources of the infrastructure on cloud
- Designed and deployed a high-availability (HA) plan for all critical applications and services
- Ensured a secure cloud environment aligned with industry best practices
- Delivered continuous application support to minimize risks and operational issues
- Monitored storage transition and optimized consumption-based movement
- Established 24x7 monitoring and management of the new cloud-hosted infrastructure with 100+ virtual servers

RESULTS

- 99.95% uptime through high-availability cloud infrastructure
- 60% cost savings enabled by optimized infrastructure and cloud consumption
- Built a foundation for market-leading applications, enabling business agility
- Seamless cloud deployment and end-to-end management ensured uninterrupted operations
